# RSConnect® Suite

Add NEC's powerful and robust corporate consolidator and flexible store management software package to your NEC RSenCounter POS touch-screen terminal to enjoy a powerful POS management solution that is simple to install, easy to operate and trouble free to maintain.

For multi-store operations, RSConnect Suite allows the retailer the ability to manage their stores remotely through the internet. Database changes, including employee files can be maintained from a remote location. Report consolidation is uncomplicated and can be viewed by year, quarter, month, week or date range.

## RSConnect Suite Features

- Efficient distribution of information from store site to corporate site
- Multi-store Editing - maintain single corporate database of PLU's, Prices, Taxes and Screen Layouts by database store group
- Maintain individual store database for employee, store messages and communication
- Consolidated reporting by time or store group, by region or a combination
- Password protected security levels
- Schedule daily and weekly tasks such as importing files and receiving consolidated reports
- Prices can be assigned to a group of stores or assigned by each store
- Hi-speed connections at each site allows store to connect to internet provider via:
  - Router with DSL cable
  - Router with Modem Back-up
- Individual store automatically "pushes" files by schedule to the FTP site
- Store database updates downloaded files prior to activation with confirmation

## Store Database Architecture

**Corporate:** Major files are common to all stores to allow for consolidation

**Database Groups:** PLU File-Assign prices for each Group of stores-or-assign prices by store

**Each Store:** Employees & Store Messages. Comprehensive tax programming is simplified

## Consolidated Reports

Consolidated reports available by group as you define them. Filter by District Manager, State, Time Period or other grouping based on your needs.
